[redacted],

Following your discussion with [redacted] earlier this week regarding the progress on the Field Supervisor implementation at British Energy, please find attached the related BEG Spec document along with the supporting documents that have been updated to reflect the change. Please note that all documents are still in draft and as yet are not formally issued.

The stations are currently developing their local implementation plans to enable roll out.

Subject: RE: Hinkley Point B Gas Bypass Contamination Event 16th July 2009

[redacted]

I am currently out of the office and will be returning on Thursday.

The detail described below is not actually correct, the current status is as follows:

All stations are currently developing a GAP analysis and implementation plan to move from the old SLO arrangements to the Field Supervisor revised arrangements, these will be presented to the working group no earlier than the 1st November. At this point each station will provide the working group with a date they propose to

implement the new arrangements. As advised to [redacted] the first station to implement the new arrangements (during outage) will be Heysham 2.

In line with the above being carried out at station the documentation surrounding the revised arrangements is currently being updated, this includes:

*
Generic management of change - completed
*
Revisions to safety management of contractors (COP004)
*
Revisions to the acquire goods and services to transfer the detail from COP004
*
New BEG SPEC within maintenance for the control of contractors working on power stations

This is currently all underway nothing will go live in the revised arrangements until such time as this has been approved by Brian Dowds, Sponsoring Director Sizewell B.

I am very keen to keep NII fully engaged with this process and do not want to jump into this without satisfying ourselves that the new arrangements are satisfactory. I will keep you posted on the progress.

King regards

[redacted],

Further to the email below from [redacted]. You will have noted from the letters regarding this matter that NII plan to inspect the implementation of new BE arrangements for the management of contractors. We understand that these arrangements will be introduced first in March 2010 at Heysham 2. In order to support this work, will you please arrange to provide a full set of the relevant procedures supporting these new arrangements.

Many thanks

Good Morning,

Ref: letters dated 16th September 5.1.3.347.2009/363316
5.1.3.347.2009/363319

With reference to the letters sent by yourselves regarding the Hinkley event, please can you replace myself with [redacted] on the distribution list. [redacted] will act as the Supply Chain contact at a management level and is also the Supply Chain representative on the working group that are implementing the change to our Management of Contractors arrangements (as referenced in both communications).

I have passed hard copies of both letters to [redacted] for [redacted] information.

Kind Regards
