Dear 

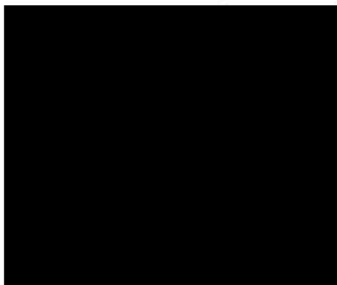

**BRITISH ENERGY GENERATION LIMITED**  
**HINKLEY POINT B POWER STATION – NUCLEAR SITE LICENCE NO 62A**  
**Gas Bypass Plant Contamination Event on 16th July 2009**

In my letter of 27th November 2009 (HPB 51132N) I gave commitments to provide a number of items as part of the recovery plan following the Gas Bypass Event.

The outstanding commitment, to carry out a Self Assessment of the Field Supervisor role following implementation, has now been completed. The Self Assessment reviewed the implementation of the new role in regard to application of the arrangements for supervising contractor activities on site. The assessment concludes that the Field Supervisor role is well understood, with those interviewed seeing it as an improvement on the previous Site Liaison Officer role. Areas for improvement are identified in regard to minor anomalies in supporting documentation, completion of authorisation and consideration of the need for a station oversight committee. Appropriate actions will be placed to ensure that these recommendations are considered.

If you require further information please contact   

Yours sincerely
