

# Office for Nuclear Regulation (ONR)

## Site Report for Hinkley Point C

Report for period 1 October – 31 December 2021

### Foreword

This report is issued as part of ONR's commitment to make information about inspection and regulatory activities relating to the above site available to the public. Reports are distributed to members for the Hinkley Point C community forum and are also available on the ONR website (<http://www.onr.org.uk/lhc/>).

Site inspectors from ONR usually attend Hinkley Point C community forum meetings where these reports are presented and will respond to any questions raised there. Any person wishing to inquire about matters covered by this report should contact ONR.

1. Inspections .....	3
2. Routine Matters .....	4
3. Non-Routine Matters.....	6
4. Regulatory Activity .....	7
5. News from ONR.....	8
6. Contacts .....	8

# 1. Inspections

## 1.1. Dates of Inspection

ONR inspectors including ONR-warranted Health and Safety Executive Construction Division inspectors made inspections on the following dates during the report period at the Hinkley Point C (HPC) construction site:

- 14 October 2021
- 10 – 11 November 2021
- 22 – 25 November 2021
- 30 November 2021
- 1 – 3 December 2021
- 13 – 16 December 2021

## 2. Routine Matters

### 2.1. Inspections

Inspections are undertaken as part of the process for monitoring compliance with:

- the conditions attached by ONR to the nuclear site licence granted under the Nuclear Installations Act 1965 (NIA65) (as amended);
- the Energy Act 2013
- the Health and Safety at Work Act 1974 (HSWA74); and
- regulations made under HSWA74, for example the Ionising Radiations Regulations 2017 (IRR17) and the Management of Health and Safety at Work Regulations 1999 (MHSWR99).

The inspections entail monitoring the licensee's actions on the site in relation to incidents, operations, maintenance, projects, modifications, safety case changes and any other matters that may affect safety. The licensee is required to make and implement adequate arrangements under the conditions attached to the licence in order to ensure legal compliance. Inspections seek to judge both the adequacy of these arrangements and their implementation.

In this period, routine inspections of Hinkley Point C covered the following:

- plant construction and/or commissioning;
- emergency preparedness;
- quality assurance and records;
- organisational capability;
- conventional (non-nuclear) health and safety;
- security

ONR's site interventions include increasing focus on NNB GenCo (HPC) Ltd's ability to adequately control construction and installation at the HPC site.

Members of the public, who would like further information on ONR's inspection activities during the reporting period, can view site Intervention Reports at [www.onr.org.uk/intervention-records](http://www.onr.org.uk/intervention-records) on our website [www.onr.org.uk](http://www.onr.org.uk). Should you have any queries regarding our inspection activities, please email [contact@onr.gov.uk](mailto:contact@onr.gov.uk).

## 2.2. Other Work

ONR continues its engagement with the project via regular site visits and meetings at NNB GenCo (HPC) Ltd's offices and supplier locations across the following themes:

- Design and Safety Case;
- Organisational Capability (including supply chain and quality);
- Pre-operations;
- Conventional Health and Safety and Fire Safety; and
- Security.

These engagements provide ONR with valuable intelligence on the progress NNB GenCo (HPC) Ltd is making developing its competence and capability to manage the design, procurement, and construction of HPC.

### 3. Non-Routine Matters

Licensees are required to have arrangements to respond to non-routine matters and events. ONR inspectors judge the adequacy of the licensee's response, including actions taken to implement any necessary improvements.

- There are no significant matters to report

## 4. Regulatory Activity

ONR may issue formal documents to ensure compliance with regulatory requirements. Under nuclear site licence conditions, ONR issues regulatory documents, which either permit an activity or require some form of action to be taken; these are usually collectively termed ‘Licence Instruments’ (LIs) but can take other forms. In addition, inspectors may take a range of enforcement actions, to include issuing an Enforcement Notice.

- The following LIs, Enforcement Notices and Enforcement letters have been issued during the period:

**Table 1: Licence Instruments and Enforcement Notices Issued by ONR during this period**

Date	Type	Ref. No.	Description
25/11/21	Licence Instrument – Agreement	LI522	Agreement to commence the start of bulk mechanical, electrical and HVAC installation in unit 1 nuclear island at Hinkley Point C

Under LC19 – construction or installation of new plant – ONR may specify that a licensee does not proceed past a specified hold point without its agreement. ONR has previously specified that NNB GenCo (HPC) Ltd shall not commence the first bulk mechanical, electrical and HVAC installation in the unit 1 nuclear island without its agreement.

ONR carried out a comprehensive programme of interventions and assessment to inform its permissioning decision related to this hold point and on 25 November 2021 we issued our agreement for NNB GenCo (HPC) Ltd to commence the start of bulk mechanical, electrical and HVAC installation in unit 1 nuclear island at Hinkley Point C.

Reports detailing the above regulatory decisions can be found on the ONR website at <http://www.onr.org.uk/pars/>.

## 5. News from ONR

For the latest news and information from the Office for Nuclear Regulation, please read and subscribe to our regular email newsletter 'ONR News' at [www.onr.org.uk/onrnews](http://www.onr.org.uk/onrnews)
